The PTCS Online Registry has moved! Join us for a Brown Bag on Tuesday, October 14 from 12:00 p.m. - 1:00 p.m. as we review the updated and freshly launched PTCS Online Registry...[More](#)

WSU Energy Efficient Block Heaters Webinar-

Please join the Washington State University Energy Program for an online webinar on the Energy

Efficient Block Heaters, as part of the "Emerging Technologies Showcase" series. The live webinar airs

Wednesday, October 15, 2014 at 12:00 PM Pacific Time...[More](#)

Brown Bag: Lighting Calculator 3.3 -

Please join BPA's Lighting Team on October 23 from 12:00 p.m. - 1:00 p.m. for a Brown Bag training session on the newly released Lighting Calculator 3.3. The planned agenda includes updates and initial feedback on Lighting Calculator 3.3, feedback and input on potential lighting promotions, and high level program, policy, and industry updates....[More](#)

Please contact the lighting team at lighting@bpa.gov with any questions.

Save the Date: Low Income Energy Efficiency Workgroup Meeting November 6 -

As part of the Post-2011 Review Process, BPA has announced its intention to convene a low income energy efficiency workgroup on a quarterly cadence. The first meeting will be held in Portland, Ore. on November 6, 2014 in the afternoon. For those who cannot make it to Portland, we will provide a conference line. Please mark your calendar and stay tuned for more information.

Reminders

The Performance Tested Comfort Systems® online registry is moving -

This move takes the database and system off of the servers provided by the previous contractor, and puts it all on servers at BPA. This enhances system security and stability, and provided an opportunity to improve the system in several ways. This fact sheet outlines the migration schedule and what you can expect from the new site...[More](#)

BPA has Consented to the Assignment of Contract Obligations from PECI to CLEAResult -

CLEAResult recently purchased PECI assets including staff, internal systems and business intelligence, and active contracts (pending approval). This impacts two regional BPA programs, EnergySmart Grocer and the Retail Sales Allocation Tool. BPA has consented to the assignment of contract obligations from PECI to CLEAResult. Upon completion of the asset transaction between PECI and CLEAResult, the parties will enter into an agreement permitting formal transfer of contract obligations from PECI to CLEAResult. PECI is also working to obtain a Consent To Assign agreement from the individual utilities participating in these programs. Please contact your Energy Efficiency Representative if you have any questions.

BPA's October 2014 Implementation Manual and Supporting Documents Now Available -

BPA's October 2014 Implementation Manual has been published and can be found on BPA's website [here](#). In addition to the updated measure information contained within the IM BPA has updated a number of the spreadsheets and calculators which have been listed below. These tools can be found on the energy efficiency [Interim Solution 2.0 web page](#). The updates to these tools are largely to ensure compatibility with the information in the updated Implementation Manual, but some also contain minor bug fixes. For more information on the updated documents please contact your EER.

- Deemed Measure Reference List v2.8
- Summarizer Tool
- Lighting Calculator v3.3
- Option 1 Custom Project Calculator v2.1
- Option 2 Custom Project Calculator v2.1
- Custom Program Calculator v2.1
- High-Performance Energy Management v6.0
- Track and Tune v6.0

BPA Concludes the EE Post-2011 Review Process -

BPA is pleased to announce that the EE Post-2011 Review Process came to a close on September 22, 2014 with the publication of the decision documents, available [here](#). The process was very collaborative and will lead to many improvements in BPA's energy efficiency program, which will help BPA and its customers continue to achieve its conservation goals. BPA sincerely appreciates customer and stakeholder participation throughout the process.

Together with customers and stakeholders, BPA has created several new means of flexibility for customers, including rollover of unused EEI funds from one rate period to another, easier access to acquiring savings from large projects, and an alternative incentive funding model. Other improvements include moving to annual publication of the Implementation Manual and a new distribution methodology for Unassigned Account funds.

Some changes will be effective October 1, 2014, such as the new methodology for distributing funds from the Unassigned Account, and others will be implemented in FY 2015 (inter-rate period rollover) or in FY 2016 (Large Project Program and conservation billing credits).
